

PREVENTING DAMP AND MOULD IN BIRMINGHAM

Training for outreach centres and community leaders

**Do you want to help people prevent damp and mould in their homes?
Do you work with clients who have issues with condensation?
Would you like to take part in a programme designed to benefit the
members of your community?**

In partnership with Birmingham City Council, Groundwork West Midlands and Thrive Together Birmingham are going to deliver a number of sessions across Birmingham providing training to frontline workers at community centres, warm welcome spaces and local charities.

These sessions will cover damp, condensation, mould and making a Groundwork Green Doctor referral for the people you work with.

Training sessions will run between June and September 2024

**GREEN
DOCTOR**

How does the programme work?

Expert Groundwork Green Doctor staff will arrange and deliver damp and mould training covering prevention, causes, identification, reporting and making a Green Doctor referral for clients who need further support.

Organisations will then be equipped to carry out their own workshops to pass on the knowledge to the citizens they work with. Materials for these workshops will be provided.

What are the benefits of getting involved?

- Full free in-person training course
- Training materials for delivery of your own workshops
- Access to expert advice from Green Doctors
- Access to Green Doctor referral system for clients

Free dehumidifiers will be available to clients you refer into our Green Doctor programme after completing your workshops.

More information on making a referral will be included in the training.
